Training & Activities:

- **Stata for Statistics & Data Analysis** Learned Data Analysis, Visualization, Regression Analysis and Cross Section Regression, Time Series and Panel Regression Methods, Different Functional Forms,
- **KoboToolbox Training** Form development, Collecting and uploading data, managing data in KoboToolbox, Advanced form development using XLSFORM,
- **Android App Development** I have completed an Android App Development Training program offered by the ICT Division of Bangladesh. The training focused on teaching individuals how to develop mobile applications for Android devices using Java programming language. During the program, I gained practical experience using tools such as Android Studio, Java Development Kit (JDK), and Android SDK to build functional and user-friendly apps. The training covered various topics, including Android architecture, user interface design, data storage, networking, and app deployment.
- **Web Design and Development** Web Design and Development training focused on modern, responsive websites using HTML, CSS, and JavaScript, including a deep dive into WordPress. Gained hands-on experience creating custom themes, designing functional web pages, and optimizing for performance. Developed a strong understanding of web development principles and specific WordPress skills, equipped for career or personal use. This Training program offered by the LICT Project Bangladesh.
